### INSTRUCTIONS: Capture Log for LIVE Animals

This form is the primary record maintained by each capture boat/vehicle/aircraft to track each live animal captured by this team. The original form stays with the boat/vehicle/aircraft; copies will be requested by officials within the Incident Management Team. This information is important to record both to document each team's capture activity and as a backup in case individual LIVE Animal Capture Forms are lost. Information should be recorded in this log for each animal captured and transported. All live animals must be accompanied by a separate LIVE Animal Capture Form, which stays with the animal until it reaches a rehabilitation facility, AND must also be signed by each transporter.

<b>Incident Name:</b> Incident-specific assigned number or incident assigned name.
